OUR BUSINESS FOUNDATION

➤ INNOVATION

Investing in technology with continuous innovation in paint, coating, construction products and services.

➤ SERVICE

Providing effective and cost efficient solutions to customers and investing resources to meet the needs of the communities.

➤ GROWTH

Focus on growing and driving a healthy business with strong profitability for the long-term.

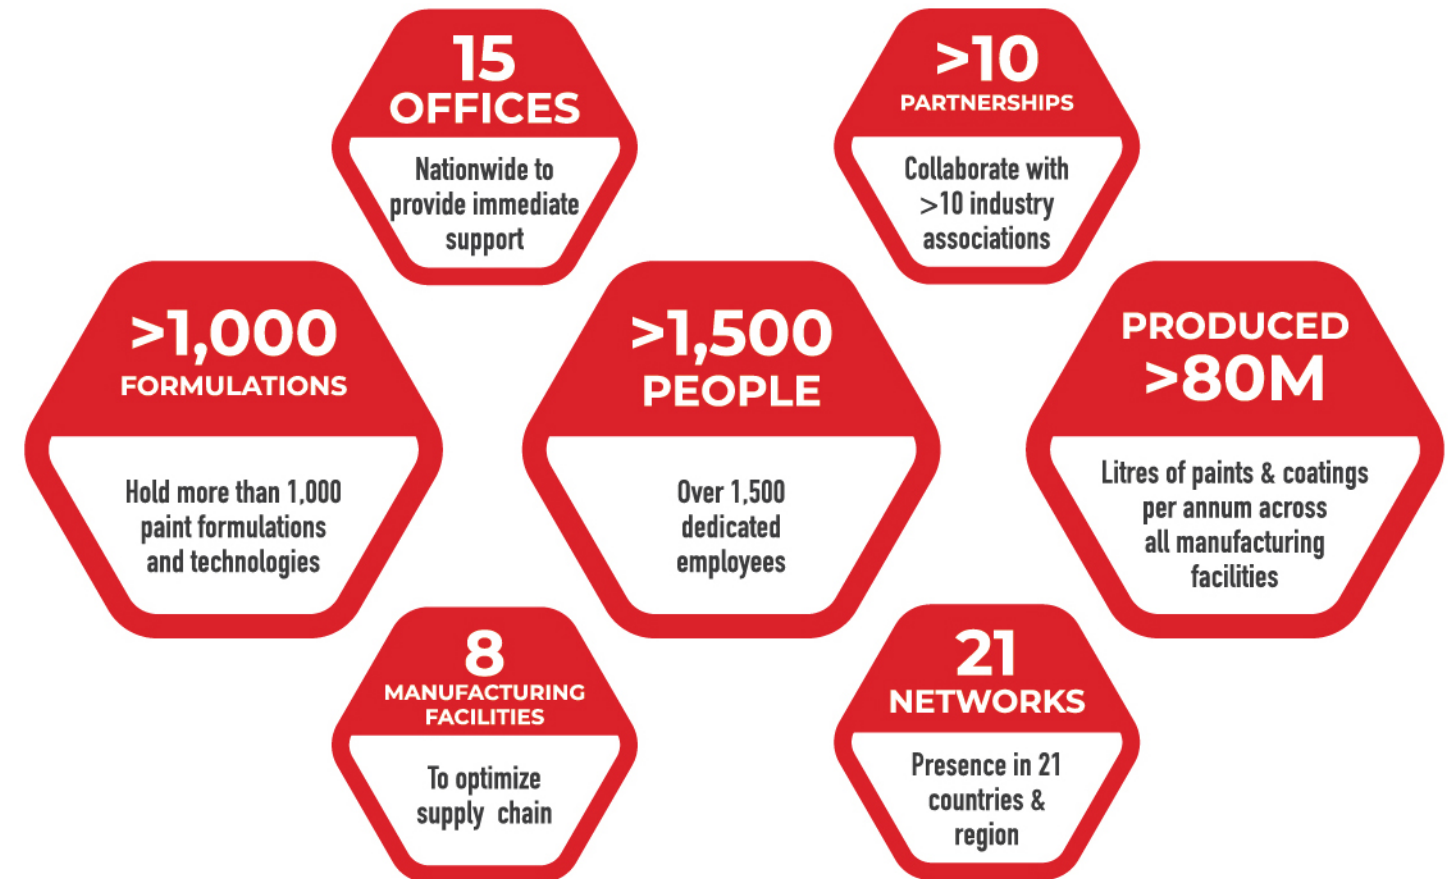

➤ LEADERSHIP

First in the region to offer Total Coating & Construction Solutions.

Asia's No. 1 in the paint and coatings industry of choice in Architectural and Industrial segments leading innovation for your business needs.

FACTS & FIGURES

AWARDS & RECOGNITION

INTERNATIONAL STANDARD COMPLIANCE

ISO 9001: Quality Management

International standard that specifies requirements for a quality management system (QMS). Organizations use the standard to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements.

ISO 14001: Environmental

International standard that specifies requirements for an effective environmental management system (EMS). It provides a framework that an organization can follow, rather than establishing environmental performance requirements.

We put quality in front of all innovation - all raw materials, formulations and operations are subjected to the most stringent test.

SIRIM MS Standards

Majority of our products are compliance with the SIRIM MS Standards below;
MS903 : Latex Emulsion Paint for Interior Use
MS134 : Latex Emulsion Paint for Exterior & Interior Use
MS125 : Gloss Enamel Paint
MS289 : Aluminium Finish Paint
MS164 : Road Marking Paints

SIRIM ECO-Label

Majority of our products are compliance with the SIRIM ECO label making our product to be green in the Malaysia market.

Singapore Green Label

Majority of our products are compliance with the Singapore Green Label making our product to be green in the international level.

ISO 12944:

Best practices in corrosion protection of structural steel.
We have coating systems that are all in compliance with the ISO 12944 best practices.

ARCHITECTURAL COATINGS ➤

The key segment in Nippon Paint, with more than 50 years of experience in introducing specialty solutions for all architectural coatings, from exterior, interior, wood and metal even to special function coatings.

Exterior Coating Series

Our Weatherbond series formulated with the innovative Quartz Technology provides at least 8 years of protection against harsh weather. Besides that, our Acratex® series offers high performance protection from crack-bridging to carbonation protection.

Interior Coating Series

We have a myriad of interior paint products for different kind of needs. For example, our Momento® series that offers luxurious and elegant special effect paint to beautify your interior space.

Antimicrobial Coating Series

With Health and Wellness focus in mind, we have developed a range of products that has anti-viral and anti-bacterial properties, providing a safe and clean indoor space.

Wood Coating Series

Wood is one of the most common materials use in building construction. As such, we have developed the Hydro series, water-based wood paint (pigmented and varnish) that helps enhance the appearance of wood while providing the protection that it deserves.

Special Function Coating

With the rising needs of different functions of coating, we have developed our anti-stick product range to curb illegal stickers on public amenities, Tile Primer that allows coatings to be applied on tiles, and many more.

Textured Coating Series

Alternative to the costly stone or marble materials, our textured coatings provide the appearance and feeling of these materials on surfaces to make your buildings unique amongst a sea of solid colours.

PROTECTIVE COATINGS ➤

Nippon Paint's Protective Coatings segment aim to protect surfaces that are highly prone to corrosion, rust and the detrimental effects of the environment with the specially formulated anti-corrosion solution. Our protective coating is ideal for any metal surfaces, structural steel works, storage tanks (for edible products, fuel, oil, water and etc.), pipes, piles, vessels and metal bridges.

Conventional Coatings

Single component, easy to use protective coatings suitable for various surfaces in atmospheric environments.

Heat Resistance Coatings

Protective coatings that resist and protect surface in high temperature environments up to 600°C.

Heavy-Duty Coatings

Two-component, high performance coatings ranging from epoxy & polyurethane for surface tolerant and tank lining.

Chemical Resistant Coatings

Protective coatings suited for highly corrosive environments. Our vinyl ester systems are suitable for environments that require strong protection against chemicals.

FLOORING SOLUTIONS ➤

Nippon Paint's Flooring Solution cuts across all industry providing seamless flooring from light to heavy duty protection for industrial areas, multi-storey car parks and even sports courts.

FloorShield

A series of products comprising of solvent-based or solvent-free resins - epoxy polyurethane, that allows flexible flooring system customization that is ideal for all industrial and car park deck flooring requirements.

Ucreeed®

Medium-duty & heavy-duty polyurethane cementitious floor coating suitable for food industries, providing excellent thermal shock resistance and certified by HACCP.

FloorSports

Be it sports court or high-end club house sports facilities, our FloorSports coating - acclaimed by the International Tennis Federation is the right solution for you.

Floor Hardener & Densifier

For customers that are only looking at hardening or densifying the floor slabs, our natural aggregate and metallic aggregate floor hardener and lithium silicate densifier would be the solution for you.

WATERPROOFING SOLUTIONS ➤

Backed with the knowledge and technology of our counterpart in China – with a long-standing presence in the waterproofing industry, we have developed systems of products ranging from Liquid Applied, Cementitious, Sheet Membrane waterproofing and more. Our myriad selection of products offer waterproofing solutions from basement to roof.

NippoSEAL

Our range of liquid apply type membrane with different polymers – polyurea, polyaspartic, polyurethane, acrylic, and bitumen, building up a seamless elastomeric membrane for any waterproofing needs.

NippoCEM

SPAN certified, polymer-modified cementitious type waterproofing membrane for any wet area waterproofing needs.

NippoMIX

Admixtures that form crystalline structures in the concrete substrate and becomes an integral waterproofing protection.

NippoGARD

A wide range of roll-on sheet membrane waterproofing from torch-on bitumen, PVC and thermoplastic membranes for all substructures and superstructures waterproofing.

NippoJOINT

Jointing, sealing and waterstop solutions ranging from PVC type and sweallable type for your construction and expansion joints.

NippoJECT

Epoxy & polyurethane crack injection solutions to repair and seal cracks to prevent further water leakage

SEALANT, ADHESIVE & FILLER SOLUTIONS ➤

V-tech's range of comprehensive bonding and sealing solutions are the perfect partners for high-quality construction. Our innovative technology provides total protection and increases the durability of building materials.

A member of NIPPON PAINT

Formulated For The Professionals
Adhesives & Sealants

Sealant: Forms a barrier between materials

V-tech is the No. 1 MS sealant manufacturer in ASEAN, having developed over 15 different types of MS sealants to meet the diverse application requirements in the construction industries, and exporting to over 90 countries worldwide.

Adhesive: Permanent bonding solution

The market needs more than just ordinary adhesion. The Vital Nails hold securely without the need for a nail, giving a strong initial grip on a range of construction materials, and never slump on vertical surfaces.

Filler: Fills gaps and cracks

The fillers fill up cracks, holes, and gaps, providing a smoother and more durable structure. They are essential, yet they fill in the imperfections in a way that no one else can.

DRYMIX SOLUTIONS ➤

With the benefit of hands-on field experience and strong technical construction solutions from CMI, a leading player in the drymix industry with a long heritage, Nippon Paint continues to push boundaries by innovating and offering total compatible solutions. These solutions offer quality beautiful finishing from bare to finish surface.

Nippon Paint's comprehensive range of Total Coating & Construction Solutions enables all types of walls, floors, waterproofing, and tiling jobs to be used as integrated systems, providing peace of mind for professionals.

Plaster & Render

Wide series of high-performance cement-sand prepacked mortar that are suitable to be used on various wall substrates, i.e. concrete, block, and brick walls.

Skim Coats

The extensive range of polymer-modified interior & exterior skim coats, designed to give your projects smooth non-powdery surface prior to painting.

Tile Adhesives & Tile Grouts

CMI develops tile adhesives for different sizes and types of tiles, including ceramic, homogenous, porcelain, granite, marbles, and glass mosaic. These adhesives are developed in accordance with the EN12004 / ISO 13007 standard. Additionally, CMI's tile grout is suitable for protecting tile joints.

Technical Mortar

Special range of technical mortar solutions such as non-shrink grout and G25 prepacked concrete mix suitable for your construction needs.

Screed

Specially blended screed comprising of Ordinary Portland Cement (OPC), graded sand and chemical additives to meet various floor requirements.

Latex Admixture

Latex emulsion polymers that cater to construction needs to enhance bonding strength for critical wall and floor substrates, tile adhesive, colour grout, and cement sand mortar for internal, external and wet areas.
